<With Respect to Subject Matters for Search>

Claims 1-4 relate to acrylic synthetic fibers comprising an acrylic copolymer which includes acrylic copolymers widely varying in comonomers and copolymerization ratio. However, the acrylic copolymers which are supported by the description in the meaning of Article 6 of the PCT and are disclosed in the meaning of Article 5 of the PCT are limited to an extremely small part of the copolymers claimed.

Therefore, a search was made for the parts which are supported by and disclosed in the description, i.e., fibers made of copolymers which have an acrylonitrile content of 60 mol% or higher and a content of sulfur atoms derived from a sulfo-containing vinyl monomer of 0.15 to 0.50 wt.% and for which the other monomer is a halogenated vinyl monomer.
